**UNIARGANA** is a Moroccan company exporting and marketing Argan oil. Organic argan products from **UNIARGANA** are marketed in Morocco and exported to all foreign countries for their high quality approved.

The Argan has innumerable virtues whether in food or for cosmetic uses, it is a great ally of your health and your beauty. **UNIARGANA** offers a wide range of products of high quality argan oil. Our company ensures that the oil it offers contains no parabens, dyes or fragrances. It is 100% natural and purely organic. Harvesting and extracting fines are missions that women in the southern region of Morocco take care of.

The first group has the task of harvesting argan almonds grown on more than 137,000 hectares. A second group of women takes care of removing the flesh from the argan to keep the nut, and the last group has the mission to break the nuts to extract the amendments that will be used to extract the argan oil. In this regard, our company **UNIARGANA** collaborates with many actors and is constantly working on the improvement of these extraction techniques to obtain the best range of argan oil and make it known to the world!

The website **UNIARGANA** is published by the company **UNIARGANA** to present you all our argan products and make you discover the virtues of this magic oil from Morocco.

## Argan Oil :

Argan oil has a worldwide reputation for its beauty and health benefits. Discover the origin of this magic oil and its various uses.

Argan oil is extracted from the fines removed from the argan nuts. However, the argan tree is found only in Morocco (especially the south-west), so it is said that the argan tree is endemic to Morocco. The argan tree grows alone in the arid and semi-arid regions of Morocco, it is found in Agadir, Essaouira, Tafraout and Taroudant. It is a very heat resistant tree, it can withstand even a temperature of 50 ° C, and survives in difficult dry conditions. Moreover, he can live up to 200 years.

Statistics show that more than 800,000 hectares are planted with argan trees, but there is a significant annual loss of argan trees of 600 hectares. As for the annual production, it varies between 2500 and 4000 tons. The height of an argan tree can reach ten meters, and it produces between 10 and 30kg of fruits. However, a fine is 55% oil, and it takes nearly 38 kg of fruit (more than a tree) to extract a liter of argan oil. Which explains its high cost!

### Specificities:

Indeed, there is a distinction between **the argan oil food** that is obtained from the roasted amendons and the cosmetic oil obtained without going through roasting. It's easy to differentiate between the two oils:

**Culinary argan oil** has a darker color, a stronger taste and is more fragrant. It is widely used in cooking in different preparations and recipes, such as the delicious Amlou which is a paste of crushed almonds, argan oil and honey. But be careful, argan oil is also used to season salads.

**Cosmetic argan oil** is characterized by a lighter color and a very light odor. Cosmetic argan oil is used for skin, hair and angles. It has a lot of virtues and the biggest cosmetics brands today boast of their high-end argan products based on argan oil Morocco!

The extraction of argan oil requires a large amount of amendons and a lot of work and time. That's why its price is expensive. The price of Argan in Morocco can reach 600 MAD, while it goes up to 200 € in Europe.

### Composition:

Argan oil is very rich in nutrients. It is particularly rich in fatty acids:

- Mono unsaturated oleic acid (omega 9): 43%.
- Polyunsaturated linoleic acid (omega 6): 36%.

Here is also the content of other elements for each 100g of argan oil: 48mg of tocopherols, 31mg of squalene, 300mg of carotene, 160mg of sterols and 5.6mg of polyphenols. All these elements give it several dietary and cosmetic properties

## 17 Ways to Use Argan Oil for Healthier + More Beautiful Skin, Hair & Nails

**Argan oil** ([UNIARGANA](#)) is a nourishing and emollient oil with anti-aging, anti-inflammatory, and anti-oxidant rich properties and is known as “liquid gold.” [Authentically sourced argan oil](#) is native to southwestern Morocco and, for centuries, has been produced using traditional methods of extracting the oil-rich kernels from the argan nut, which is removed from the argan fruit that grows on argan trees in the UNESCO protected biosphere reserve. This precious oil has been used and admired for centuries, well-known for its [healthy and beautifying benefits for skin, hair and nails](#).

It's important to note that, while many companies claim their products contain pure organic argan oil, this is not always the case. There are many argan oil products out there on the market, and some only contain finite amounts of argan oil as an ingredient. Generally, it is purported that pure organic argan oil can contain 300% more tocopherols (Vitamin E) than products that contain argan oil as an ingredient.

Find out more about what to look for in [100% pure organic argan oil](#), and what to watch out for...And, here are some general tips on [choosing pure, organic beauty products](#).

**1.** Perhaps, the most commonly used way is to use your argan oil as a *facial moisturizer* for all skin types. Argan oil is well-known for its healing and restorative anti-aging, antioxidant-rich, and anti-inflammatory properties that heal and beautify skin naturally.

2. ***Facial massage*** benefits. Add a drop or two of your favorite organic essential oil. Massage and argan oils sebum balancing properties make this an ideal moisturizing oil for even oily and acne-prone skin types.

3. Use as a ***natural lip and eye make-up remover***. Don't worry about getting argan oil into your eyes or harming your delicate eye area. Nourish your eyes with twice the amount and three times the amount of linoleic acid of Vitamin E as olive oil. This emollient healing "liquid gold" oil is beneficial for diminishing fine lines and wrinkles like crow's feet and laugh lines.

And, treat your lips to healthy nourishment as you hydrate, soothe, and condition with Vitamin A and Vitamin E. After a day or evening of lip-color wearing, get your lips back to their natural state.

4. Use as a ***natural lip conditioner and/or exfoliator***.

**Quick and Easy DIY recipe**— add coffee grounds or rolled oats to some argan oil, and get rid of the dry "flakies," as you moisturize and condition your smackers, naturally.

**Tip:** You can use this soothing exfoliator on your face and body, also.

5. ***Full body moisturizer***. One of the most important steps in skincare routine is moisturizing your skin. Especially in the colder months, when nature's elements can make your skin feel dry and scaly. And, every time you cleanse your skin and exfoliate, add the moisture back in, with a healthy natural glow.

Many moisturizers contain harsh additives and harmful chemicals that can actually have the opposite effect, stripping the moisture from your skin and disrupting the balance.

6. Use as a ***massage oil***. Add your favorite essential oils. Whether it's a full body massage, back massage, face massage, or hands and feet massage, using argan oil as a massage oil can be a very pampering spa treatment-like experience.

Apply gentle pressure, and learn some of the reflexology points in your ears, hands, and feet to get the maximum health benefits out of this treatment. Treat yourself to massage with argan oil, or treat someone you love with a spa-like experience.

**7. *Brighten and condition your tattoos***, naturally. Maintain the beauty of your body art, and give argan oil as a gift this season to someone special who wants to keep their skin and tattoos healthy and beautiful.

**8. *Scalp massage***- stimulates healthy hair growth and helps increase circulation for a healthier scalp and hair. Have dandruff? Try adding a few drops of tea tree oil. Enjoy the soothing scent of lavender for a relaxing experience or the uplifting scent of eucalyptus for an invigorating experience. Here are some ideas for different essential oils and some of their properties and benefits.

**9. *Hot Oil Hair Treatment***- heat up oil (not too hot; please be careful), and add to your scalp and hair from the roots to the ends. Then, wrap with a warm towel (optional), and let condition for several hours or overnight.

**Tip 1:** While you wait, you can add some healthy nourishment to your cuticles and nails, with a hand or foot massage.

**Tip 2:** Wash and condition your hair, and add a few drops of your argan oil to your shampoo and/or conditioner for an ultra-hydrating experience.

**10. *Leave-in Conditioner***- apply a few drops of argan oil to damp, towel-dried hair from roots to ends, *and comb through using a wide tooth comb*.

**Tip:** Adding a few drops of your favorite essential oil can be a scent-sational experience as your hair dries, naturally.

**11.** Soften, smooth, and add some shine by using argan oil as a ***styling serum***. Calm down those out-of-control frizzies and tame those wild fly-aways. Smooth a few drops over clean, dry hair, after rubbing together in the palms of your hands. Works well as a finishing serum to help add some polish to your favorite style.

Recover from the winter stresses and repair hair damage from heat styling tools, as you take a break from beauty products with chemicals. And, let your hair breathe, recover and repair, naturally.

**12.** Want to strengthen your delicate, brittle nails, but hesitant to try a ***nail strengthener*** with toxic chemicals?

Here is a **pure, natural, healthy alternative**: 1 drop of argan oil can go a long way, and depending on the size of your nails, sometimes you can distribute 1 drop throughout all 5 of your nails on each hand or foot.

**14.** Oh, **baby!** Argan oil is a great ***natural moisturizer for babies' skin***. [Please skip that baby oil or any type of moisturizer that contains harsh chemicals and additives that can be harmful to your baby's health.](#) And, combat your baby's diaper rash, with a healthy source of essential fatty acids (80% unsaturated fatty acids), squalene, carotenes, sterols, phenols, vitamins, and antioxidants.

**15.** Help heal and ***improve cellulite and stretch marks***, by massaging argan oil into these areas regularly. The tocopherols (Vitamin E) in pure organic argan oil, which is 2 times the amount in olive oil, acts as a free-radical scavenger, helps the skin absorb other nutrients and retain moisture balance, and promotes healing for damaged skin.

**16.** Helps ***heal scars and burns***. Rich in nutrients, Omega 6 and Omega 9, Vitamin A and E, prostaglandin, ferulic acid, and many other nourishing and healing elements, pure organic argan oil is ideal for scars and burns and can help prevent scarring.

**17. Soothe irritating bug bites and insect stings.** Those pesky critters bites' and stings' can range widely from uncomfortable to painful and problematic.

Argan oil's anti-inflammatory and anti-bacterial properties will help soothe and improve your bite or sting and should help tone down the redness, irritation, and itchiness or stinging. The squalene in pure organic argan oil helps your skin retain its moisture and acts as an antioxidant, protecting from free-radical damage.

**Tip:** Better not forget this bottle when you take your next hike or go on a camping trip!

**BEAUTY-IN-A-BOTTLE DOES-IT-ALL FOR YOUR SKIN, HAIR, & NAILS** – Multiple Healing Benefits for Face & Body – Nourish & Restore Skin's Moisture Balance for a Healthy, Natural Glow – Protect Against The Elements & Repair Damaged Skin – Improve Cellulite, Stretch Marks, Bug Bites, Acne Scars & Much More
